EXPERIENCE

Long Term Internship February 2024 - May 2024
ENOCA

- Developed custom components on SAP Commerce (Hybris) and implemented database operations using custom DAO, service, and facade layers.
- Customized the backoffice, developed performance-oriented cronjobs and interceptors to create solutions for CRUD operations.
- Designed database structures, implemented Excel import/export functionalities, and indexed product attributes using SOLR.

Internship August 2023 - September 2023
ROKETSAN

- Oracle, ERP

Internship July 2023 - August 2023
KARABUK UNIVERSITY- DIRECTORATE OF INFORMATION TECHNOLOGY

- I developed a quiz application with admin and user panels using Java Spring Boot. In the admin panel, I implemented CRUD operations for questions, making them easily manageable.
- With the user panel, I enabled participants to answer questions, view their results in real-time, and review their past performance.

EDUCATION

Karabuk University | 2019-2024

Bachelor's Degree in Computer Engineering

- GPA: 3.05

PROJECTS

Weather Forecast Demo

HTML, CSS, Tailwind Css, Angular, Spring Boot, OpenweatherAPI, OpenscreetAPI

- I developed a project that provides real-time weather information (city-based) using the free API version of OpenWeatherMap and OpenScreetMap.

Word Recall Quiz Bot Code

Java, Telegram API

- Using Java and Telegram API, I developed a Telegram bot that improves users vocabulary

Diagnosis of Sepsis Disease Using Machine Learning Algorithms Code

Python, Machine Learning

- Project, supported by the TÜBİTAK 2209-A program, enables early diagnosis of sepsis disease using ML algorithms.
